

Machine Problem 1:

Create a C and C++ program that will prompt the user to enter 2 integers. Thereafter, the program will display the sum, difference, product, quotient, and remainder. Your output should look like the following:

Number 1: 10

Number 2: 3

The result of $10 + 3 = 13$.

The result of $10 - 3 = 7$.

The result of $10 * 3 = 30$.

The result of $10 / 3 = 3$.

The result of $10 \% 3 = 1$.

Requirements:

1. C program
2. C++ program

Note: Submit the .c and .cpp files only.
